

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): A user's request reflecting design system for timely and accurately reflecting users' requests on a product, comprising:

design data publicizing means for publicizing design data to users through a computer network;

correction data receiving means for receiving and storing correction data as said design data corrected by a user through said computer network; and

design assisting means for reflecting said correction data received by said correction data receiving means on product design,

wherein said design data publicizing means including  
public design data prepared in advance to be publicized among said design data,  
an editing program file for editing said public design data, and  
a design data publicizing processing unit responsive to a request from a terminal  
connected to said computer network for transferring said public design data and said editing  
program file to said terminal.

2. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data is three-dimensional data.

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

3. (canceled).

4. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data publicizing means including  
  
public design data prepared in advance to be publicized among said design data,  
  
an editing program file for editing said public design data, and  
  
a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and wherein  
  
said editing program file enables editing of three-dimensional data.

5. (original): The user's request reflecting design system as set forth in claim 1, wherein said correction data receiving means including  
  
a data base for registering said correction data, and  
  
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base.

6. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data publicizing means including  
  
public design data prepared in advance to be publicized among said design data,  
  
an editing program file for editing said public design data, and

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and

said correction data receiving means including

a data base for registering said correction data, and

a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base.

7. (original): The user's request reflecting design system as set forth in claim 1, wherein said correction data receiving means including

a data base for registering said correction data, and

a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base,

said received mail processing unit

classifying said correction data attached and registering said correction data in said data base based on personal information of a user recited in said electronic mail.

8. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data publicizing means including

public design data prepared in advance to be publicized among said design data,

an editing program file for editing said public design data, and

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and

said correction data receiving means including

a data base for registering said correction data, and

a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base,

said received mail processing unit

classifying said correction data attached and registering said correction data in said data base based on personal information of a user recited in said electronic mail.

9. (previously presented): The user's request reflecting design system as set forth in claim 1, wherein

said design data publicizing processing unit including

information entry selecting means allowing a user to select either information entry in the form of a menu or transfer of said public design data and an editing program file.

10. (original): The user's request reflecting design system as set forth in claim 1, wherein said correction data receiving means including  
a data base for registering said correction data, and  
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base, and

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

in creation of said design data by said design assisting means, said correction data registered in said data base is used.

11. (currently amended): A user's request reflecting design method of timely and accurately reflecting users' requests on a product, comprising the steps of:

publicizing design data to users through a computer network;

receiving correction data as said design data corrected by a user through said computer network; and

reflecting said correction data received on product design,

wherein said design data publicizing step including the step of

in response to a request from a terminal connected to said computer network, transferring

public design data prepared in advance to be publicized among said design data and an editing

program file for editing said public design data to said terminal.

12. (canceled).

13. (original): The user's request reflecting design method as set forth in claim 11,

wherein

said correction data receiving step including the step of

receiving an electronic mail to which said correction data is attached and registering said

correction data in a data base for registering said correction data.

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

14. (original): The user's request reflecting design method as set forth in claim 11,  
wherein  
said design data publicizing step including the step of  
in response to a request from a terminal connected to said computer network, transferring  
public design data prepared in advance to be publicized among said design data and an editing  
program file for editing said public design data to said terminal, and  
said correction data receiving step including the step of  
receiving an electronic mail to which said correction data is attached and registering said  
correction data in a data base for registering said correction data.

15. (previously presented): The user's request reflecting design method as set forth in  
claim 11, wherein  
said correction data receiving step including the steps of  
receiving an electronic mail to which said correction data is attached, and  
classifying said correction data attached and registering said correction data in a data base  
based on personal information of a user recited in said electronic mail.

16. (previously presented): The user's request reflecting design method as set forth in  
claim 11, wherein  
said design data publicizing step including the step of

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

in response to a request from a terminal connected to said computer network, transferring public design data prepared in advance to be publicized among said design data and an editing program file for editing said public design data to said terminal, and

said correction data receiving step including the step of

receiving an electronic mail to which said correction data is attached, classifying said correction data attached and registering said correction data in a data base based on personal information of a user recited in said electronic mail.

17. (currently amended): A server of a user's request reflecting design system for timely and accurately reflecting users' requests on a product, comprising:

design data publicizing means for publicizing design data to users through a computer network; and

correction data receiving means for receiving correction data as said design data corrected by a user through said computer network and storing said correction data so as to be usable by design assisting means for reflecting said correction data on product design,

wherein said design data publicizing means including

public design data prepared in advance to be publicized among said design data,

an editing program file for editing said public design data, and

a design data publicizing processing unit responsive to a request from a terminal

connected to said computer network for transferring said public design data and said editing program file to said terminal.

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

18. (canceled).

19. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said correction data receiving means including  
a data base for registering said correction data, and  
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base.

20. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said design data publicizing means including  
public design data prepared in advance to be publicized among said design data,  
an editing program file for editing said public design data, and  
a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and

said correction data receiving means including  
a data base for registering said correction data, and  
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base.

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

21. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said correction data receiving means including  
a data base for registering said correction data, and  
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base,  
said received mail processing unit  
classifying said correction data attached and registering said correction data in said data base based on personal information of a user recited in said electronic mail.

22. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said design data publicizing means including  
public design data prepared in advance to be publicized among said design data,  
an editing program file for editing said public design data, and  
a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and

said correction data receiving means including  
a data base for registering said correction data, and  
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base,

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

said received mail processing unit

classifying said correction data attached and registering said correction data in said data base based on personal information of a user recited in said electronic mail.

23. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said design data publicizing processing unit including

information entry selecting means allowing a user to select either information entry in the form of a menu or transfer of said public design data and said editing program file.

24. (previously presented): The user's request reflecting system as set forth in claim 1, wherein

an electronic mail, to which said correction data is attached, is received at said correction data receiving means, said electronic mail comprising personal information of the user.

25. (previously presented): The user's request reflecting design method as set forth in claim 11, further comprising:

receiving an electronic mail to which said correction data is attached, said electronic mail comprising personal information of the user.

26. (previously presented): The server of a user's request reflecting design system as set forth in claim 17, wherein

AMENDMENT UNDER C.F.R. § 1.116  
U.S. Application No. 09/781,253  
Attorney Docket No. Q63086

an electronic mail, to which said correction data is attached, is received at said correction data receiving means, said electronic mail comprising personal information of the user.
